Heet Dobariya

+91-9913301308 | heetdobariya07@gmail.com | LinkedIn | GitHub | Leetcode | Codeforces

Profile

Computer Science graduate with hands-on experience in Python backend development, AI/ML, and RAG-based applications. Experienced in building and enhancing production AI systems using FastAPI, LLMs, vector databases, and graph databases, with a strong foundation in machine learning and software development.

Education

Pandit Deendayal Energy University — Gandhinagar, Gujarat
Bachelor of Technology in Computer Science, Minor in Internet of Things — *Sep. 2022 – May 2026*
CGPA: 9.48

Ashadeep International School — Surat, Gujarat
Higher Secondary Education — *Aug. 2020 – May 2022*

Technical Skills

Languages: Python, C, C++, SQL, Java, HTML, CSS, JavaScript, TypeScript
AI/ML: Machine Learning, Deep Learning, NLP, LLMs, RAG, Prompt Engineering, Transformers, BERT, Scikit-learn, TensorFlow, Keras
Backend & Databases: FastAPI, PostgreSQL, MongoDB, Pinecone, Qdrant, Neo4j
Tools & Cloud: Git/GitHub, AWS, Azure, ESP32, Arduino, Edge Impulse

Experience

Founding Engineer — Sep 2026 – Present
Serin Labs — *Ahmedabad, Gujarat*

- Contributed to the development and maintenance of Serin AI, implementing assigned features and resolving bugs to improve application functionality and reliability.
- Conducted comprehensive quality control (QC) across the platform, identifying and reporting functional bugs, edge cases, and usability issues to the development team.
- Worked on Serin MCP and developed a ChatGPT plugin integration, preparing and submitting it for review in the ChatGPT plugin directory.

Jr. Software Engineer — Jan 2026 – Jul 2026
Growexx AI Solutions LLP — *Ahmedabad, Gujarat*

- Completed structured training in Git/GitHub, Python, SQL/PostgreSQL, ML, DL, RAG, Prompt Engineering, AWS, and Azure, applying the skills to production projects.
- Contributed to **Ojavix** by implementing client-driven enhancements and backend features in Python/FastAPI, working closely with senior developers to prepare the product for delivery.
- Collaborated with cross-functional team members to understand existing systems, troubleshoot issues, implement requirements, and deliver production-ready AI solutions.

Data Science Intern — Feb 2025 – Jan 2026
Blink Analytics — *Ahmedabad, Gujarat*

- Curating domain-specific datasets for fine-tuning and optimizing LLMs using SFT and RLHF, enhancing accuracy and contextual relevance.
- Evaluating and debugging LLM outputs using custom benchmarks & interpretability tools in production settings.
- Working with cross-functional teams to deploy scalable AI solutions and sharing best practices on generative AI internally.

AI/ML Intern — May 2024 – June 2024
Nexus Info — *Coimbatore, Tamil Nadu (Remote)*

- Programmed "TravelGuru" chat-bot and "EduAdvisor" for travel guidance and college admission.
- Designed a disease prediction system using machine learning techniques to improve diagnostic accuracy.

Projects

Ojavix - AI Therapist Chatbot | *Python, FastAPI, RAG, Pinecone, Neo4j, Azure Document Intelligence*

- Contributed to the Python/FastAPI backend of an AI therapist chatbot using RAG to provide knowledge-grounded responses from therapist-provided documents.
- Implemented the retrieval pipeline using Azure Document Intelligence for PDF extraction, Pinecone for vector search, and Neo4j for graph-based nodes and relationships generated through LLM calls.
- Developed contextual therapy workflows combining vector/graph retrieval, short- and long-term user memory, and admin-defined response instructions; supported information and therapy modes with an admin panel for user, knowledge graph, and credit management.

QSkim - Govt. Scheme Discovery Platform | *RAG, BGE-M3, Qdrant, FastAPI, Next.js, Groq, Sarvam* | GitHub Link

- Built a full-stack AI platform for discovering, understanding, and comparing Indian government schemes using profile-based recommendations and grounded RAG.
- Developed hybrid retrieval with BGE-M3 and Qdrant, combining semantic search with metadata-aware filtering for eligibility matching and scheme-specific Q&A.
- Implemented automated scraping and knowledge-base construction with Playwright/BeautifulSoup, plus multilingual and voice interaction using Sarvam and WhatsApp integration via Twilio.

IoT Fire Detection & Pump Control System | *ESP32-CAM, Edge Impulse, TinyML, DHT11, MQ-2, Arduino IoT Cloud* |

- Built a low-cost fire detection and suppression system that runs a computer vision model on-device on an ESP32-CAM, classifying camera frames in real time without a server or internet connection.
- Collected a custom dataset of 176 images (fire / no-fire) with the ESP32-CAM itself and trained and deployed a 96x96 TinyML model with Edge Impulse.
- Automated the response so that fire detected with confidence above 0.8 sounds a buzzer and switches a 9V water pump through a relay. Temperature, humidity and gas/smoke levels are monitored with DHT11 and MQ-2 sensors and sent to an Arduino IoT Cloud dashboard.

Scholaris - Assignment Evaluator | *Flask, MongoDB, Groq API* | GitHub Link

- Built a web app for teachers to create assignments, students to submit work, and teachers to evaluate submissions, while enabling file uploads and document parsing for formats like TXT, PDF, and DOCX.
- Developed backend with Flask (Python) and MongoDB for managing assignments and submissions, utilizing the Groq API to generate assignment questions, and designed responsive interfaces with HTML, CSS (Bootstrap), and Jinja2 templates.

TalentLens - Resume Ranking System | *BERT, SpaCy, Regression Models, Flask, MongoDB* | GitHub Link

- Built an AI-powered web app to analyze and rank resumes against job descriptions using NLP and semantic similarity.
- Implemented resume parsing, skill extraction using SpaCy, and matching using Sentence Transformers (BERT embeddings) combined with ML models (Gradient Boosting, Random Forest, Ridge, SVR) for accurate relevancy scoring.
- Designed a scalable Flask and MongoDB backend for efficient data storage and retrieval.

Certifications

GATE – Data Science and AI (DA) | AIR: 3876, Score: 432	March 2025
The Complete Neural Networks Bootcamp: Theory, Applications (Udemy)	April 2026
SQL and PostgreSQL: The Complete Developer's Guide (Udemy)	Feb 2026
Foundations of Agents (Hugging Face)	May 2025
Advanced Learning Algorithms (Stanford Online)	April 2024
Supervised Machine Learning (Stanford Online)	March 2024
